When compared to the competition, this free version of the software has more features, although some require a premium purchase in order to be fully usable. Pros Deep Windows integration BullZip PDF Printer Standard installs a printer driver on your PC, which makes it available in every application that has the ability to print.

This means that you can now have a single unified way of generating PDF documents, regardless of the app you happen to use. Advanced PDF options From the softwares settings screen you can change the level of detail on the generated PDFs, add author details and watermarks, encrypt the printed files, and even append other PDF documents to them. Macros in names One unique feature of the software is the ability to customize the names of the generated PDF documents by inserting builtin macros. In our tests we were able to set the naming style to use the documents name followed by the author. Cons Crippled functionality Some options, such as digital certificates and high resolution watermarks, are not available in the free version of the software. You can still use the aforementioned features, but the end PDF will show that it is created with demo software. Bottom Line If you find yourself needing to create PDF documents from a dozen different programs on a regular basis, you should consider getting BullZip PDF Printer Standard. Since it functions like an ordinary printer, there is very little to learn, so you can get to work straightaway. Not only are there many reports of malware BUT installing this on one of my systems caused it to be unable to print to ANY PRINTERS and pretty much forced me to completely rebuild the Windows from scratch. CNET should remove this POS software from there site ASAP or they will lose all credibility among users who download it. I used this program for about a year with no problems, but when I installed a new version it completely corrupted my Printing ability. I could not manually uninstall drivers to any of my printers in the component services menu, which is normally the only way to take out all of the driver components. We know the free version is ad driven which is stated on their site. Care to elaborate with some specifics Comodo Firewall Scan was unsure about the Bullzip.dll, so I uninstalled Bullzip and the spam stopped and I was no longer reported on projecthoneypot.org, so my best estimate is that Bullzip or their friends are sending out spam and using my computer as their agent to generate income. It installs a bunch of trash and overwrites default settings. Click here to review our site terms of use. Once reported, our staff will be notified and the comment will be reviewed.
